BMW F20 M135i Backbox Exhaust Installation Guide

The Direnza Exhaust Backbox Delete is a high performance, aftermarket Exhaust allowing your BMW 1 Series F20 M135i & F22 M235i to really scream! Manufactured from T304 brushed stainless steel & TIG welded with ultimate care.

DISCLAIMER

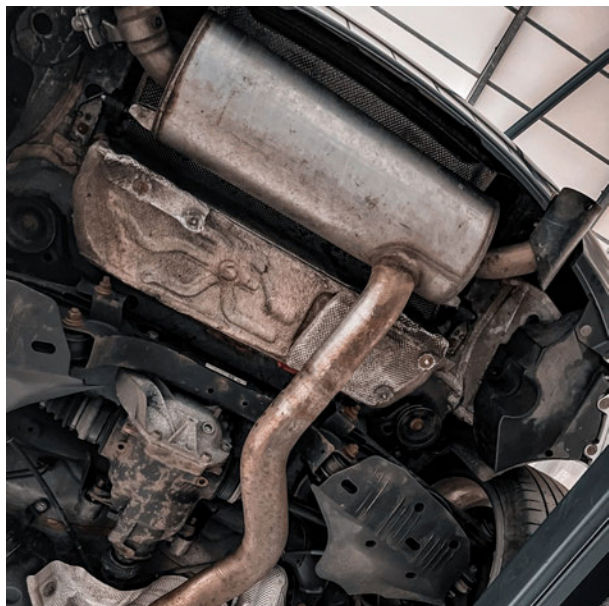

- Allow the vehicle to cool completely prior to installation.
- We recommend that the Exhaust is installed by a professional.
- Direnza is not responsible for any vehicle damage or personal injury due to installation errors, misuse or removal of Direnza products.

TOOLS REQUIRED

- Saw / Cutting Tool
- 13mm Socket
- Jack, Jack stands/Ramp or lift

1x Backbox Delete
2x Exhaust Tips
3x Clamps

1. Lift the car in the air.

2. Measure 19.5cm away from the backbox, as shown above. Final position may vary ± 0.5 cm.

3. This point will be where the exhaust needs cutting.

4. Ensure the cut you make is as parallel as possible.

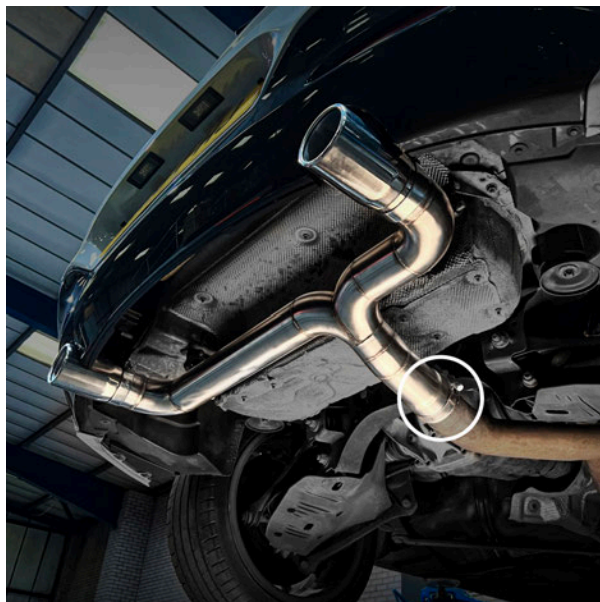

5. Step 4 continued.

6. The Direnza Backbox can now be lifted into position and installed on the hangers.

7. Step 6 continued.

8. The Backbox sleeves over the OEM Exhaust.

9. Tighten the clamp using a 13mm socket

10. Install the tips using supplied clamps and 13mm socket.

11. You have now successfully installed your Direnza Performance Backbox Delete.
